PREPARATION SHEET – NOTIFICATION OF COCKROACH SERVICE

Dear Tenant

We have been hired to provide a program for cockroach control in your apartment/condominium building.

To make this program a success, we have several procedures that should be followed. They are listed below:

- All units should be inspected. If you are not going to be home on the day we are scheduled to be in your building, please make arrangements to have a key left with the manager, landlord or a neighbor. This assures you and you neighbor of a thorough and complete inspection/service.
- Please empty out underneath cupboards, under the kitchen and bathroom sinks. This provides better access for a more thorough inspection.
- If you are experiencing a cockroach problem, let us know. Leave a note on the kitchen counter or some conspicuous place so that we may better serve you.
- Please make perimeters of all rooms accessible for inspection.
- If treatment is necessary because of cockroach activity, only EPA registered products will be used. They will be placed in safe, appropriate areas secure from children or pets. All products are applied in accordance with labeled and manufacturer's directions and in accordance with state and local regulations.
- All services will include the placement of cockroaches monitors (e.g. traps, monitors, etc.)
- If a fogging service is needed everyone including pets MUST vacate the residence during service and 4 hours after service is complete.

Thank you for your help in making this control program successful. We will be in your unit on the following date.

DATE OF SERVICE

APPROXIMATE TIME

PLEASE NOTE: WE ALWAYS BEGIN OUR TREATMENTS ON THE TOP FLOOR. TO HELP KEEP THIS JOB ON SCHEDULE, PLEASE DO NOT ASK TO START ON ANOTHER FLOOR OR TO MOVE FROM FLOOR TO FLOOR.
